

'Cleanseal' Enclosed Cleaning Systems

Precision Cleaning Made Simple

Today's production cleaning processes must not only be capable of providing consistently high standards of cleanliness but also be cost-effective to use and comply with ever more stringent health and safety and environmental legislation.

Component cleaning using halogenated solvents has long been recognised as a highly effective method of removing a wide variety of contaminants from components during manufacture, or repair and overhaul activities.

'Cleanseal' machines have been designed to make best use of the unique properties of halogenated solvents to provide superior, ultrasonic cleaning, high component throughput capability and outstanding solvent efficiency. 'Cleanseal' machines are also extremely energy efficient, and require no cooling water, important benefits in the light of today's ever-increasing utility costs.

'Cleanseal' machines are fully automated and simple to operate. They boast an impressive list of standard features with options available to satisfy even the most demanding application.

Cleanseal
by 

'Cleanseal' Features:

- Stainless Steel Construction.
- Fully Automated Operation.
- Twin-Compressor, Refrigerated Cooling.
- Enclosure with Sealing Doors.
- Ultrasonic, Liquid Immersion Cleaning.
- Fine Filtration on Immersion Cleaning Stage.
- PLC with HMI Touch-Screen.
- Internal Basket Handling System.
- Internal Bund Tray.
- Full Safety Circuitry.

'Cleanseal' Machine Range

| MODEL: | UNITS | 200M | 300M | 400M |
|----------------------|--------|------|------|------|
| Overall Length | mm | 1240 | 1700 | 2100 |
| Overall Width | mm | 890 | 980 | 980 |
| Overall Height | mm | 2508 | 2300 | 2360 |
| Basket Length | mm | 100 | 320 | 400 |
| Basket Width | mm | 230 | 235 | 300 |
| Basket Depth | mm | 150 | 180 | 250 |
| Ultrasonic Power | W | 600 | 600 | 600 |
| Ultrasonic Frequency | kHz | 40 | 40 | 40 |
| Solvent Charge | litres | 14 | 36 | 69 |

The above data is approximate for illustration purposes only.

'Cleanseal' Benefits:

- Simple to Operate.
- Compact Design.
- High Component Throughput Capability.
- Low Running Costs.
- Clean, Dry Components Every Time.
- No Cooling Water Required.

Component Cleaning That Doesn't Cost The Earth
